2016 - 2020 Lincoln MKX 1073 Installation Instructions

IMPORTANT. Please write down your “Key-Code” number and store in a safe place. This number will be needed to order replacement or extra keys. **DO NOT STORE INSIDE THE VAULT.**

Fig. 1

- 1) Remove all your contents from the center console including the factory pad. Take your Console Vault and slip it down into the compartment. Make sure you gently push the Vault down so it sits firmly down into this compartment. Open the lid of your Console Vault and notice the two (one on each side) threaded fittings located on each side of the vault.
- 2) Now take one of the two self cutting screws that came with the kit and thread it into one of these fittings. Now using a socket or wrench start turning the screw (see figure 1). These screws are designed to cut their own hole as they turn. Fully turn the screw down, then repeat for the other side. **VERY IMPORTANT!!!! NO NOT OVER TIGHTEN THESE SCREWS, ONCE THE SCREW IS FULLY DOWN STOP. OVER TIGHTENING WILL CAUSE DAMAGE TO THE FITTING.**
- 3) Next put the liner in the bottom of the console and the installation is complete.
